Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The present invention pertains a method for performing forward error correction in a SONET/SDH system.

The prior arts do not teach combination steps of dividing the number of bytes by the interleaving depth thereby producing B byte chunks; segmenting each byte chunk based on k of the coding factor thereby producing a number of segments; encoding each segment in accordance with the coding scheme thereby producing consecutive FEC sub-frames, each FEC sub-frame including non-parity bytes and parity bytes; concatenating separately the non-parity bytes and corresponding parity bytes of (B/k) consecutive FEC sub-frames thereby producing rows of a FEC frame having X rows, where X is equal to the interleaving depth; and consecutively interleaving each row of the FEC frame thereby producing a coded data string.

In addition, the prior arts do not teach the combination steps of receiving a coded data string forming a row of a SONET/SDH-FEC frame; estimating bit error using a BIP-8 algorithm thereby characterizing transmission line conditions without the benefit of the forward error correction; de-interleaving the coded data string thereby creating X rows of a FEC frame, where X equals the interleaving depth; decoding each FEC frame in accordance with the coding scheme thereby producing decoded data strings and interleaving the decoded data strings thereby forming a row of a SONET/SDH frame.

Thus claims 1-21 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
